

GUIDANCE

Catalogue of support documents for NSW mine health and safety legislation

Occupational Health and Safety Act 2000
Occupational Health and Safety Regulation 2001
Mine Health and Safety Act 2004
Mine Health and Safety Regulation 2007

December 2007

NSW DEPARTMENT OF
PRIMARY INDUSTRIES

Overview

The NSW Government commenced new legislation on 21 December 2007 to better protect the healthy, safety and welfare of workers in the NSW metalliferous, extractives and opal mining sectors.

The *Mine Health and Safety Act 2004* and the *Mine Health and Safety Regulation 2007* were commenced on this date. Duties under the MHS Act and the MHS Regulation will commence on 1 September 2008.

The new legislation supports the *Occupational Health and Safety Act 2000*, which is the primary legislation regulating health and safety in NSW workplaces.

This Catalogue of Support Documents provides a road map to published material to help industry better understand matters covered by health and safety legislation in relation to mining work in the metalliferous, extractives and opal mining sectors.

Disclaimer

The compilation of information contained in this document relies upon material and data derived from a number of third party sources and is intended as a guide only in devising risk and safety management systems for the working of mines and is not designed to replace or be used instead of an appropriately designed safety management plan for each individual mine. Users should rely on their own advice, skills and experience in applying risk and safety management systems in individual workplaces.

Use of this document does not relieve the user (or a person on whose behalf it is used) of any obligation or duty that might arise under any legislation (including the Occupational Health & Safety Act 2000, any other Act containing requirements relating to mine safety and any regulations and rules under those Acts) covering the activities to which this document has been or is to be applied.

The information in this document is provided voluntarily and for information purposes only. The New South Wales Government does not guarantee that the information is complete, current or correct and accepts no responsibility for unsuitable or inaccurate material that may be encountered.

Unless otherwise stated, the authorised version of all reports, guides, data and other information should be sourced from official printed versions of the agency directly. Neither the Department of Primary Industries, the New South Wales Government, nor any employee or agent of the Department, nor any author of or contributor to this document produced by the Department shall be responsible or liable for any loss, damage, personal injury or death howsoever caused.

Users should always verify historical material by making and relying upon their own separate inquiries prior to making any important decisions or taking any action on the basis of this information.

Codes of Practice

National Codes of Practice

Control of work-related exposure to hepatitis and HIV
Manual handling
Material safety data sheets (supplier duties)
Prevention of occupational overuse syndrome
Safe handling of timber preservatives and treated timber
Safe use of synthetic mineral fibres
www.ascc.gov.au/ascc/HealthSafety/OHSstandards/ or contact the Australian Safety and Compensation Council on 02 6121 5317

NSW Codes of Practice

Note that the NSW Codes of Practice relating to the following have already been approved by the Minister for Mineral Resources and apply to the NSW mining sector:

Control of workplace hazardous substances
Storage and handling of dangerous goods
Workplace amenities
www.workcover.nsw.gov.au/Publications/LawAndPolicy/CodesofPractice/default.htm

Note that the NSW Codes of Practice relating to the following will apply to the NSW mining sector upon the proposed full extension of the OHS Regulation on 1 September 2008:

Control of work-related exposure to hepatitis and HIV
Manual handling
Material safety data sheets (supplier duties)
Prevention of occupational overuse syndrome
Safe handling of timber preservatives and treated timber
Safe use of synthetic mineral fibres
Electrical practices for construction work
Mono-strand post-tensioning of concrete buildings
Cutting and drilling concrete and other masonry products
Amenities for construction work
OHS induction training for construction
Labelling of workplace substances
Noise management and protection of hearing at work
OHS consultation
Safe use of pesticides
Work in hot and cold environments
Formwork
Safe work on roofs - commercial and industrial
Excavation
Moving plant on construction sites
Safe work on roofs - part 2 – residential
