

ELIMINATION

Eliminate dust at the source.
Isolate workers from the dust.

SUBSTITUTION

Substitute the hazard creating
the dust with something else.

ENGINEERING CONTROLS

Suppress the dust through
engineering controls.

ADMINISTRATIVE CONTROLS

Implement administrative controls.

PPE

Personal Protective Equipment is the last line of
defence against dust exposure.

SILICOSIS IS ENTIRELY PREVENTABLE

A new respirable crystalline silica workplace
exposure standard of $0.05\text{mg}/\text{m}^3$ has taken
effect in NSW.

**Dust - Just because you can't see it,
doesn't mean it's not there.**

Visit the dust toolkit for more resources. resourcesregulator.nsw.gov.au
